PURPOSE OF CONFERENCE

This conference aims to bring many important research streams together. Computer Information Systems and their applications in Image Analysis and Processing, Biometrics in both behavioral and physiological categories comprise researches in Information Processing Systems and Human Identification and Recognition Techniques.

Therefore, researchers are encouraged to submit their contributions in both theoretical and practical aspects of the following Topics.

TOPICS

The topics of the conference include the following scientific research areas of Computer Science.

- Biometrics Security and Multi-media

Preprocessing Methods, Feature Extraction, Face Description and Identification, Retinal and Iris, Tongue, DNA and EEG Biometrics, Multi-modal Biometric Methods, Medical Analysis, Border Control, Biometric Cryptosystems, Fingerprints, Hand Palm and Hand Geometry, Speech and Speaker Verification and all other topics on Human Description, Classification, Identification and Recognition, Kansei Engineering, Affective Systems and Human Emotion Measuring Techniques

- Computer Information Systems

Signal & Image Analysis and Processing, Computer Graphics and Vision, Object Classification and Recognition, Artificial Intelligence, Ambient Intelligence, Ubiquitous Systems, Mobile and Pervasive Computing, Security, Mobile Ad-hoc and Sensor Network Service-oriented Framework and Middleware Network and Application Hardware, Quality of Services (QoS), Medical, Multimedia

- Classification and clustering with application

Classification, Clustering, SVM, Neural gas, Bayesian Models, Neural Networks

- Industrial Management and other Applications

Decision Analysis and Methods, E-Business and E-Commerce, Engineering Economy and Cost Analysis, Engineering Education and Training, Global Manufacturing and Management, Human Factors, Information Processing and Engineering, Intelligent Systems, Manufacturing Systems, Operations Research, Production Planning and Control, Project Management, Quality Control and Management, Reliability and Maintenance Engineering, Safety, Security and Risk Management, Service Innovation and Management, Supply Chain Management, Systems Modeling and Simulation, Technology and Knowledge Management

PAPER SUBMISSION

Research papers (8-12 pages) in Springer LNCS style should be submitted through the EasyChair system. If the paper includes more than 12 pages there is payment per additional page to help cover

the added cost of printing. Up to 2 extra pages per paper are allowed. Oral or poster presentation of the paper is allowed.

PROCEEDINGS AND PUBLICATION

Authors are invited to submit technical papers describing original research. Submissions must be original and should not have been published previously or be under consideration for publication while being evaluated for this symposium. Authors will be required to sign a copyright release. Accepted papers will be published in the conference proceedings, in the Lecture Notes in Computer Science series, by Springer-Verlag. The proceedings of CISIM 2013 has been indexed by Thomson ISI.
